Attn: Scott McNary

Reference: Letter of Recommendation

Dear Scott,

Obayashi / PSM wishes to thank you and your colleagues for the incredible support your team offered our challenging project. From picking beam designs, deck loading analyses, and integrated segment drawings all the way through design of temporary structures such as our temporary pylon towers, stay anchorages, work platforms, and temporary bracing, your firm was always able to deliver timely, accurate, and efficient solutions.

As you'd likely agree, our project was one of the more technically demanding bridge projects constructed in the U.S. Without the significant efforts of the McNary Bergeron team it is hard to imagine how this project could have been completed successfully.

Please do not hesitate to use our firm and our project as a reference.

Sincerely,
Obayashi / PSM JV

Jeff St. John
Project Manager
