

RiNo Pedestrian Bridge

Denver, CO

Project Description

A 272-foot suspension pedestrian bridge will provide connectivity across the South Platte River for the northern Denver River North (RiNo) neighborhood. The preliminary design (30%) was led by the City of Denver and paid for the North Denver Cornerstone Collaborative and Office of Economic Development. Final design and construction of the bridge is being completed as a public-private-partnership between the City of Denver and Zeppelin Development in conjunction with the non-profit Bridges to Prosperity. The new crossing will provide an important link to Denver's pedestrian and bicycle community, with connectivity for the RiNo and Globeville neighborhoods.

Owner

Zeppelin Development

Contractor

Hamilton Construction

Designer

McNary Bergeron & Associates

Our Role

McNary Bergeron provided preliminary and final design for the pedestrian suspension bridge, and is providing construction engineering and design support during construction.
