

South Island Line (East) Rail Project

Hong Kong

Project Description

The MTR 903 project is part of a multi-contract expansion of Hong Kong's Mass Transit Railway system. The project includes two stations linked together by 1400m of precast segmental viaducts. The South Island Line will link Admiralty Station to South Horizons in Ap Lei Chau, with intermediate stations at Ocean Park, Wong Chuk Hang and Lei Tung. The total project value is \$325 USD and will connect 90,000 residents on the south side of Hong Kong island to the city's rail system.
